Did You Know?

- High-pressure welders must demonstrate critical thinking and skill to read plans and carry out all the welds to be done in the correct sequence.
- According to the 2006 Technology Road Map study, there are over 300,000 Canadians working in the welding industry who contribute over $5 billion to our economy.

We are Close To Home

Our Welding - High Pressure Program is available at the NOVA Career Centre located in the vibrant city of Châteauguay, Québec. We offer a wide variety of top-notch Vocational Training Programs in the heart of southwest Québec minutes away from Montréal. The knowledgeable teaching staff at NOVA ensures that every student receives the attention they need. The number of students in our classes is kept small, creating a learning environment more tailored to your individual needs, while encouraging more collaboration among students.

Welding – High Pressure

About the program

Students in the High Pressure Welding program receive a hands-on and theoretical training in the field of pipe welding. You will learn all the skills necessary to start a successful career in this high demand industry. At the state-of-the-art Nova Career Centre, students will develop their welding skills using modern equipment with common arc welding processes such as Shielded Metal Arc Welding (SMAW/Stick), Gas Metal Arc Welding (GMAW/MIG), Flux Core Arc Welding (FCAW) and Gas Tungsten Arc Welding (GTAW/TIG). Students learn to work with a diversity of materials including mild steel, stainless steel and aluminum. Graduates are prepared with the knowledge to pass the practical welding certification examination conducted by Emploi Québec, certifying candidates to weld high pressure pipes in the province. This program is only open to those who have experience in welding.

Skills you will learn

- cutting and preparing pipes
- welding pipes in the 1G, 2G, 5G & 6G positions
- reading and understanding blueprints

The journey begins with **you.**
